

S-100WG Letter 2/2022

12 September 2022

S-100 Working Group 7 Meeting Logistics

Reference:

- a. S-100WG6 [Decision 6/56](#), *Date and location of the next meeting*
- b. S-100WG6 [Action 6/87](#), *GI Registry workshop*

Dear S-100 Working Group Members,

The next S-100 Working Group (S-100WG7) meeting is scheduled from December 5-9, 2022, in conjunction with the 2nd Geospatial Information (GI) Registry Workshop which will follow on from December 12-13, 2022 in Monaco. The draft agenda for the S-100WG7 meeting and the GI Registry Workshop, as well as further logistics information for the meeting, will be posted on [the S-100WG7 meeting page](#) in coming weeks.

Major themes that will be discussed at the S-100WG7 meeting are:

1. Proposals for Corrections and Clarifications for S-100 Edition 5.0.0
2. S-98 Interoperability progress
3. S-164 Test Data Set Development
4. S-100 Validation Development
5. S-101 Edition 1.1.0 approval

The GI Registry Workshop will cover all aspects of GI Registry interaction, including an overview of the Registry and its Registers; interrogation of Register content; roles and responsibilities within the Registry content proposal and approval process; Registry tools; and development of the Registry User Guidance document (S-99 Annex A).

A couple of items to note regarding the meeting and Workshop:

1. This will **not be a hybrid meeting**, however, streaming of the meeting will be considered for those that just want to listen.
2. The deadline for papers for full consideration is **October 31st, 2022** (normally, it is six weeks before the meeting, but since we are expecting a full agenda, I'm providing an additional week grace period.)

Yours sincerely,

Julia Powell
(IHO – S-100WG Chair)
