S-102 Impact Study

Dear S-100 Working Group Members,

The S-102 Project Team has been working towards an updated edition 2.1 of S-102 to continue to refine the product specification for operational use. As part of moving forward with the next edition of S-102, and in accordance with IHO TR 2/2007 it is required that an impact analysis be conducted in order to ensure that moving forward with an operational edition of S-102 will have minimal impacts to the wider hydrographic community.

An online questionnaire for the upcoming S-102 revision has been created at the following link: https://IHO.formstack.com/forms/s_102_impact_study

The latest edition of S-102 can be found here:
https://iho.int/uploads/user/Services%20and%20Standards/S-100WG/S-100WG6/S100WG6_2022_8.1a_EN_S102_2_1_0_Clean.pdf

Please provide your responses to the impact study by January 8th, 2022

Yours sincerely,

Julia Powell
(IHO – S-100WG Chair)
